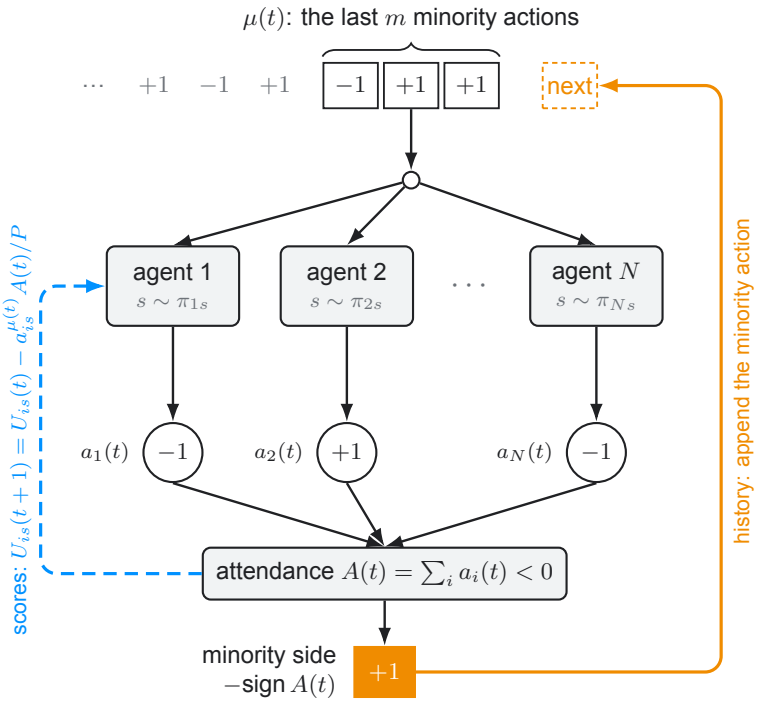
A One round of the minority game



B Agent i's two strategies ($m = 3$)

history μ	strategy 1	strategy 2	
$-1\ -1\ -1$	$+1$	-1	
$-1\ -1\ +1$	-1	-1	
$-1\ +1\ -1$	$+1$	$+1$	
$-1\ +1\ +1$	-1	$+1$	$\leftarrow \mu(t)$
$+1\ -1\ -1$	-1	$+1$	
$+1\ -1\ +1$	$+1$	-1	
$+1\ +1\ -1$	$+1$	$+1$	
$+1\ +1\ +1$	-1	$+1$	

Scores before the round: $U_{i1}(t) = 2.4, \quad U_{i2}(t) = 0.9$

Boltzmann choice at $T = 1.5$, the score gap:

$$\pi_{i1} = \frac{e^{2.4/T}}{e^{2.4/T} + e^{0.9/T}} = 0.73, \qquad \pi_{i2} = 0.27$$

The minority was $+1$, strategy 2's action for $\mu(t)$:
U_{i2} rises and U_{i1} falls.
